Summary

Recent Computer Science cum laude graduate with 3 years of experience in community empowerment via energy policy, seeking to support California's population and environment via IT infrastructure operation and software development. Experienced in Java mobile app development, JUnit/Espresso testing, and SQL database management.

Education

Bachelor of Science in Computer Science

California State University, Sacramento

Cisco Ethical Hacking Certificate

Graduated May 2025

GPA: 3.745

February 2026

Skills

Languages

- Java
- Python
- Kotlin
- SQL

Tools

- Git
- MySQL
- Power Bi
- Excel

Relevant Coursework

- Software Engineering
- Data Structures and Algorithms
- Data Mining
- Advanced Database Management

Experience

Hydroficient Cybersecurity Extern

Extern Inc.

March 2026 - Present

Remote

- Develop a real-time security dashboard using **Streamlit** to monitor pipeline health, detect threats, and track system status.

Engineering Student Assistant

California Energy Commission

October 2021 - August 2025

Sacramento, California

- Administered company and user accounts to enforce access compliance, role assignment, and system availability.
- Provided global **Tier 1** troubleshooting for company and user accounts reporting access issues and performed password resets.
- Launched security incident investigation and communicated with stakeholders and management to rectify the incident report.
- Engineered custom visualizations using Matplotlib and Seaborn embedded in Power BI dashboards, enabling team to identify trends that standard out-of-the-box visuals could not capture.
- Reduced manual data preparation time by developing semi-automatic dashboards, allowing engineers to focus on analysis.
- Created and maintained accessible documentation of software systems and processes for over 13,000 stakeholders, which proactively reduced the amount of inbound inquiries.

TechArt Consultant | Programming Tutor

California State University, Sacramento

August 2024 - December 2024

Sacramento, California

- Implemented a creative robotics curriculum by guiding underrepresented middle school students through **Arduino** kits that included sensors and actuators and scratch code to build self-elected artistic projects such as cars and musical jewelry boxes.
- Took initiative by working with instructors to implement procedures that improved student learning and retention.
- Primary professor's assistant in teaching fundamental Arduino and programming concepts by guiding 20+ college students, among 6 groups, through debugging Arduino (C++) code and building of circuits to construct technical solutions for final business projects, resulting in strong business models.

Projects

Sweetea Boba App | Java, JUnit, Espresso, Kotlin, Jira, Agile

August 2024 - May 2025

- Led a 6-person cross-functional team, utilizing Jira to manage backlogs, track sprints, and ensure timely delivery of milestones.
- Architected UI in Kotlin, including dynamic menu viewing, drink customization logic, and the secure checkout pipeline.
- Utilized Git for version control and iterative feature development.
- Developed and executed a comprehensive testing suite using JUnit, Jetpack Compose, and Espresso to perform unit and UI testing, ensuring backend reliability and a bug-free user experience.

Alien Invasion Mobile Game | Java, MVC Architecture, Design Patterns, OOP

August 2024

- Engineered a mobile game using MVC architecture, implementing Singleton, Command, and Observer patterns to manage global state and event-driven interactions.
- Developed a hierarchy via abstract classes and interfaces to manage distinct behaviors for entities like Aliens and Astronauts.
- Designed a responsive user interface, incorporating real-time health bar tracking, a dynamic scoring system, and a display for game state values.

Activities & Awards

CSUS AI Hackathon: Perseverance Award

April 2024
